Flightstar grows capabilities with expanded interior fabrication shop.

Champaign, IL (KCMI) – April 11th, 2016 – Flightstar Corporation opened its doors on an expanded 4,300 square foot interior fabrication shop. This shop, attached to its main Maintenance, Repair, and Overhaul (MRO) hangar, was constructed exclusively to handle the current and future needs for interior fabrication. The new interior shop includes an array of new specializing tooling, a sanding bay, and a 380-sq-ft paint booth. This new paint booth offers the ability of interior and exterior finishing work and the flexibility of working on multiple components simultaneously up to 20 feet in length.

“Our fabrication shop addition allows for Flightstar to preform all of our work in house, guaranteeing the highest quality of craftsmanship all while allowing us to shorten our completion timelines” stated Technical Sales Director, Rodd Caldwell. “This addition adds a new level of service for our existing and future customers, enabling additional projects to be completed during their regular maintenance cycles.”
